*Our mission is to engage, inspire and transform youth using flight lessons as a launching pad! Our Aviation Career Program offers students 3 days of professional flight instruction in a Cessna 172 along with self awareness and leadership training. Students interact with airline pilots, flight attendants, air traffic controllers, aircraft mechanics, airport operators, airport patrol and aircraft rescue and fire fighters. Workshops are given in aircraft maintenance and air traffic communications. This program is for youth ages 14-21. Scholarships are available for those who qualify.
